

# SANITISER

Our sanitizer come in a Gel or Liquid formula.  
Effective in killing germs and bacteria.  
An alternative to washing hand with water and soap.

## All Clean Multipurpose Liquid

is designed for cleaning of clothes, floors, tiles, basins, bathtubs, sinks, vehicles, cookers, extractors, hoods, fryers, pots, glasses, and other kitchen appliances.

It is recommended for Hotels, Hospitals and other institutions.

## Hand Wash

Enriched with moisturizing and scented formula. Our hand wash leaves your hands clean, soft, smooth and dry free skin.

Applicable with mounted soap dispensers. Most suitable for high human traffic areas i.e. Hotels, Restaurants, Hospitals and Public rest rooms.

Available in Different aromas:

- Apple
- Lemon
- Rose
- Strawberry

## Dish Wash

Formulated for both manual wash and dish washing machines, our dish washing detergent leaves dishes oil free and odorless.

Skin friendly, table ware and cutlery friendly. Leaving a fresh scent, sparkling and glossy finishing.

## Antistain

Is highly efficient acidic stain remover. It is applicable to toilets, toilet bowls, showers, bathrooms, bathtubs, swimming pools, tiles etc. Do not use it on coloured surfaces/tiles.

## Combat STAIN REMOVER

It is slightly acidic based liquid detergent suitable for removing stains on tiles, concrete, terazzo and other surfaces. It has both cleaning and disinfecting effects coupled with quick fungicidal action. It leaves the surface sparkling clean with fresh scent. Do not use it on coloured surfaces/tiles.

## Disinfect & Clean

Disinfect & clean is a concentrated disinfectant specially formulated for basic cleaning of floors, showers, bathrooms, bathtubs, tiled walls, washbasins and other hard surfaces, it will leave the surface odour and germ free with fresh, lasting pine scent.

## Car Shampoo

A concentrated gel with unique grease cutting formula suitable for both ordinary and metallic colours. Leaving your car with a fresh scent, sparkling glossy finishing internally and externally.

## INSTRUCTION FOR FIXING AND MAINTENANCE

### Cutting & Drilling

Fiberlite roofing sheets may be cut by hand or by power saws. When cutting by hand, a fine tooth blade must be used, held at a shallow angle to the panel. When using power tools, the best results will be obtained with a 44 to 60 grit abrasive disc, operating at approximately 3700 r/min.

Saw operators should wear dust-filter masks and safety glasses or goggles. Fiberlite roofing sheets may be fixed around obstructions using standard tin snips. Holes should be drilled, not punched. Such holes should be drilled 3mm oversize to allow for thermal movement: large bonded washers should be used to protect against the ingress of moisture.

**Cleaning** - To ensure a long life of high quality, the roofing sheets must be cleaned with water periodically, the frequency of which will depend on static and environmental conditions. Detergents may be used if necessary. Persistent stains may be removed by rubbing with bristle brush - not a wire brush. Tar or grease deposited from industrial atmospheres may be removed with white spirit.

**Repairs** - Small holes or tears may be patched with resin and fibreglass chopped strand mat (glass-fibre reinforcement material).

Othe profile and colour can be manufactured on customer request

## Sanitary Ware

## Bath Tubs

Deciding between an porcelain or fiberglass bathtub? Well, it's difficult to choose a winner, but fiberglass bathtub are trending among contractors because they offer multiple advantaged over cast iron or porcelain bathtubs. Fiberglass bathtub could offer plenty of shapes that could satisfy the most demanding homeowner and interior designer.

In addition to that, fiberglass bathtubs are generally less expensive than other bathtub types.

Fiberglass bathtubs can be fabricated faster than any other, thus the pricing is so affordable. As added value, fiberglass bathtubs can be found on just any shape and color. This type of bathtubs can be manufactured almost five times thicker than other bathtubs providing excellent oxidizing protection, and will not discolor through the years. If you are planning a remodeling job in places where you might find space limitations, or condos with lots of stairs and hallways, they could be the best alternative to use because they are not as heavy as other bathtubs.

## FOLDED HAND TOWEL

**Your best choice when cost & hygiene are important**

### Single sheet dispensing

Effective single sheet dispensing. 1 sheet per pull. Use only what you require

### High Wet Strength

Maximum absorption. The product's water retention capabilities ensure the paper does not breakup thereby controlling usage and reducing wastage

### Hygienic

One touch one towel dispensing process reducing risk of cross contamination.

### Top up system

allows new towels to be placed on top of existing, to prevent running out.

### Quiet dispensing

Suitable for noise sensitive areas

## ROLLED HAND TOWELS

### Centre-Pull - Barrel Hand Towels

Continuous roll for high usage applications

### High absorbency

Ideal for quick wiping in busy environments.

### Quiet dispensing

Suitable for noise sensitive areas.

### Stylish

Designed to blend in with the decor of image conscious establishments.

### Kitchens

Most suitable for use in food preparation areas.

# KITCHEN TOWEL

Our Kitchen Towels have Unique Thirst Pockets, making them thicker, stronger and more absorbent.

## Uses

- Dry off Liquid Spills
- Clean Surfaces
- Absorbs Fats
- Dry off Crockery
- Dry off your hands

---

# MICROBURST SYSTEM

Automatic Air freshening system

Delivers power, performance and flexibility in half the size of standard aerosol dispenser.

Delivers three times the odour control of fragrance and ordinary refills.

The patented refill actuator distributes the finest mist that hangs in therefore long lasting performance.

Highperformance Batteries and Refill Services included.

Choice of 5 Fragrances.

30 day refills.

## SANITIZER

### Hand Sanitizer System

Instant hand rub sanitizer  
Kills 99% of germs without water  
Unique Sealed Cartridge Design prevents product cross contamination  
Ideal for use in the health and food service industry

### Toilet Seat Sanitizer System

Disinfects toilet seats to avoid cross contamination  
Kills 99% of germs without water  
Environmentally superior system  
Improved hygiene

---

## FOAM SOAP

### Hygienic sealed pouch

Prevents cross contamination.

### Tremendous Cost-In-Use

#### Upto 50% saving vs normal liquid soap.

Only 0.5ml used per squirt, compared to 2ml of liquid soap per squirt.

### Luxurious foamy lather

leaves hands feeling clean & moisturized.

### Anti-bacterial

contains active ingredients to fight bacteria and other micro-organisms, making it suitable for commercial applications such as: food preparation & healthcare

## INTERLEAVE TOILET PAPER

### Most hygienic format

Effective single sheet dispensing, sheet touched only by the user

### Less Tissue Dispensed

Up to 40% less used than with rolled formats

### Highly Efficient

Low maintainance, fewer trucks on the road, reduced transport costs and less storage

## Jumbo Toilet Paper

### For high traffic areas

Delivering high capacity with minimal maintainance

## Small Roll Toilet Paper

### Home comfort feel

Suitable for hotels and small businesses.
